

# Prepare for Success!

Help your child  
succeed.

## ATTEND AN ORIENTATION EVENT IN YOUR AREA!

*"Our experienced teachers and administrators have found that students who have prepared for the learning methods at PA Cyber and are self-motivated to reach their goals drastically improved their chances of the success in education for which they strived."*

*Andrew Oberg, PA Cyber Executive Director*

## Why Should I Attend?

### Parents:

- Increase your confidence through a guided training of the technology in order to be successful in facilitating your child's online instruction
- Gain insight as to the role and responsibilities of a parent educator
- Network with other families

### Students:

- Virtually tour your new school
- Learn how to effectively navigate through the programs you will use to go to school
- Interact with cutting-edge equipment that will be issued to each student
- Learn about how to connect with other students

*Various members of our staff will be available to assist students in learning the instructional technology to complete their required class work. They will walk away with the knowledge to be successful in a cyber school environment.*
